ODIN™ CHECKPOINT

The smarter way to keep a check on your operational tasks and critical equipment

- **Decrease** downtime with real-time alerts to the right people.

- **Empower** technicians to handle planned and unplanned maintenance.

- **Digitise** verification and safety checks.

- **Give** technicians interactive SOPs to work smarter.

- **Take** your production records digital.

- **Get** quick cloud access to project and asset documentation.

- **Monitor** your plant performance via live analytics.

- **Make** customer audits and compliance a breeze with digital records.

- **Capture**, organise and share data.

Pairs with

ODIN™ RAVEN

Make legacy machines smarter

Connect this non-invasive, AI-enabled sensor with the ODIN Checkpoint dashboard to:

- Collect vibration data
- Detect anomalies
- Take preventative action
- Monitor production performance

The paperless solution for any production environment
